SUMMARY

AI product designer with 3+ years shipping LLM and B2B SaaS products end-to-end. I turn hard workflows into interfaces that disappear, cutting hour-long tasks down to minutes. Founding-designer speed, design-system rigor, and I take Figma straight into working frontend with Cursor and Claude Code when speed matters.

WORK EXPERIENCE

Northern Trust

Jan 2026 - Present

Product UX & Design

Wealth & Asset Management · B2B Enterprise

- Interviewed 8 portfolio managers and dug into usage data to find where time was lost - used those findings to align Product, Engineering, and Compliance before starting any design work.
- Redesigned financial reporting workflows for portfolio managers scanning dense data under time pressure - broke dense screens into layered views and cut time-to-insight by 30% across 3 core modules.
- Built 20+ Figma prototypes across sprints, checked feasibility with engineers at every stage, and stayed accountable through QA and post-launch iteration.

FlairxAI

Apr 2025 - Dec 2025

Founding Product Designer

AI Hiring Platform · End-to-End Product + Design System Ownership

- Joined as the first designer with nothing in place - built the design system from scratch (tokens, components, docs, mobile and web) before engineering had a single component to work from.
- Redesigned the recruiter workflow from intake through evaluation - cut candidate review time from 40 minutes to 5 and scheduling time from 2 hours to 30 minutes.
- Shipped the MVP two months early by prototyping with Figma AI and Claude, running weekly reviews with engineering, and documenting every component spec - no revision rounds at exec review.
- Reviewed every component with engineering before it shipped against WCAG 2.1 AA - zero accessibility violations in the product at launch.

Keel Foundation

Sep 2024 - Feb 2025

Product Designer UI/UX

Accessibility-First SaaS · Research-Driven Redesign

- Before redesigning anything, ran research with 12 participants across interviews, surveys, and usability tests - turned the findings into personas, journey maps, and blueprints the whole team could work from.
- Redesigned the navigation to surface what users needed without burying everything else - complexity dropped 40%, satisfaction went up 15%, and the team adopted it as the standard pattern across the platform.

Distro - ATLAS Institute, CU Boulder

Jan 2024 - May 2024

UX Research Lead

B2B Retirement Distribution Software

- Talked to financial advisors and found the product was solving the wrong problem - turned those findings into personas and journey maps that convinced the team to pivot product direction.

My Sassy Interiors

Jan 2022 - Jun 2023

Design Lead, UI/UX & Program Management

- Drove a full visual website redesign grounded in brand storytelling, increasing site visits by 35% and client consultation rates by 21%.
- Mentored junior designers across 6 concurrent projects; process standards contributed to 20% client base growth.

EDUCATION

M.S. Creative Technology & Design

2023 - 2025

CU Boulder, ATLAS Institute · Scholarship Recipient

Bachelor's in Design (Honors)

2018 - 2022

Woxsen School of Arts and Design, India

SKILLS & TOOLS

Design: Figma, Photoshop, Illustrator, Adobe XD, Framer, Axure

UX: End-to-End Product Design, Wireframing, Prototyping, Interaction Design, Design Systems, User Research, Usability Testing, WCAG 2.1 AA, IA, Heuristic Evaluation

Technical: HTML, CSS, JavaScript (foundational), SQL, API Concepts, Agile, Design-to-Engineering Handoff

AI & Velocity: AI-Assisted Ideation & Prototyping, Research Synthesis with AI, Content Generation, Design Automation (n8n), Loveable

RECOGNITION

Finalist, Women in Product x Lovable Hackathon 2026. Led design and shipped a working AI-powered product in 48 hours with a team of 5.
